## PROFILE

Senior Computer Engineering student passionate about Cloud, DevOps and AI. Experienced in automation, progressing for scalable solutions and active in developer communities.

## EDUCATION

University of Technology and Arts in Warsaw  
B.S. in Computer Engineering

Expected Graduation, Mar 2027

- Related Coursework:** Object-Oriented Programming, Data Structures & Algorithms, Computer Organization & Programming, Web Development, Artificial Intelligence, Statistics, MS Excel
- Technical Skills:** Python, C, Java, JavaScript, Git, Linux

## EXPERIENCE

### FOREO Sweden

Warsaw, Poland (Remote)

Python / AI Trends Assessment, API, Tasks Automation Developer  
Internship

12.2024 – 05.2025

- Researched 15+ AI tools to identify automation use cases for marketing and internal operations.
- Developed Python scripts integrating APIs to reduce repetitive manual workload.
- Designed and implemented a web-based dashboard to manage AI-assisted tasks and visualize data.
- Enhanced usability by applying UX principles and gathering feedback from internal users..

## PROJECTS

### MediMatch AI

[Project Presentation ↗](#)

Tech Stack: Gemini AI, GenKit

- Built an intelligent assistant that checks drug and food compatibility for users with allergies or chronic conditions..
- Integrated Gemini Flash 2.5 for compatibility analysis between medical profiles and new products.
- Led a 4 member team that won **1st place** at Google AI Hackathon 2025.

### Screen-OCR-Translator

[GitHub/Repo ↗](#)

Tech Stack: PowerShell, OCR, APIs

- Developed a cross-language desktop translator that captures screen text and translates instantly.
- Implemented an efficient OCR pipeline improving detection accuracy on varied screen fonts.

### Credit Risk Scoring

[Live ↗](#)

Tech Stack: Python, ML, Docker, Render

- Created a Dockerized ML model predicting customer credit risk levels using structured financial data..
- Improved model reliability and container scalability through streamlined CI/CD deployment.

## TECHNICAL & SOFT SKILLS

**Programming Languages:** Python, Java, OOP

**Familiar with:** HTML, CSS, JavaScript, C

**Tools & Technologies:** Git/GitHub, Linux, APIs, Docker, AWS, Azure

**Soft Skills:** Analytical thinking, collaboration, problem solving, adaptability

**Languages:** Turkish (fluent), English (advanced), German (Beginner)

## EXTRACURRICULAR

Google Developer Groups on Campus PW core team member  
Warsaw University of Technology

04.2025 – Present

- Contributed to planning and organizing the club's event, aimed at connecting students with developer tools and communities.
- Actively participating in future planning of technical workshops and faculty-student initiatives.
