PROFILE

Third year Computer Engineering student building scalable solutions at the intersection of Cloud services, Development & Operations. Experienced in designing robust architectures, automating deployments and delivering end-to-end products

EDUCATION

University of Technology and Arts in Warsaw

Expected Graduation, Apr 2027

B.S. in Computer Engineering / Major: Application Programming

- GPA:** 4.52 / 5.00
- Related Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Databases, Web Development, Artificial Intelligence, Statistics, Operating Systems, Computer Networks & Security

EXPERIENCE

FOREO Sweden

Warsaw, Poland (Remote)

Software Engineer Intern

12.2024 – 05.2025

- Built a Python pipeline scraping **4** academic sources using **Selenium** and **BeautifulSoup**, processing **3+ papers daily** on automated cron jobs
- Integrated **Gemini API** and **Google Cloud TTS** to generate blog summaries, podcast scripts and short-form videos with MoviePy, reducing content creation from **hours to under 5 minutes**
- Automated multi-platform publishing to WordPress, YouTube (Data API v3) and RedCircle
- Designed a **Streamlit** dashboard and managed **SQLite** database schemas to store processed academic data.

PROJECTS

MediMatch AI / Group Project

[Project Presentation](#)

Tech Stack: Gemini AI, GenKit

- Built an intelligent assistant that checks drug and food compatibility for users with allergies or chronic conditions.
- Integrated **Gemini 2.5** for compatibility analysis between medical profiles and new products.
- Led a 4-member team that won **1st place** at Google AI Hackathon 2025.

Screen-OCR-Translator

[GitHub/Repo](#)

Tech Stack: Electron.js, Translate APIs · Python

- Developed a desktop app that captures screen regions, extracts text via **OCR** and translates into **100+** languages
- Designed an Electron-Python IPC architecture for asynchronous text processing.

Credit Risk Scoring

[Live](#)

Tech Stack: Python, Django, scikit-learn, Docker

- Built end-to-end **ML web app** with Django and scikit-learn, deployed live on Render Cloud.
- Designed a pipeline with StandardScaler and Logistic Regression trained on **1,000+ records** across **5** financial features.
- Automated zero-touch deployments on every push to main using **Docker** and GH Actions **CI/CD**.

TECHNICAL & SOFT SKILLS

Programming Languages: Python, Java, HTML, CSS, SQL

Frameworks/Libraries: Django, Scikit-learn, NumPy, Pandas

Developer Tools: Git/GitHub, GH Actions, Docker, PostgreSQL, Azure

Technologies: REST APIs, Linux, Bash scripting

Languages: Turkish (fluent), English (advanced), German (Beginner)

EXTRACURRICULAR

Google Developer Groups on Campus PW core team member

04.2025 – Present

Warsaw University of Technology

- Contributed to planning and organizing the club's event, aimed at connecting students with developer tools and communities.
- Actively participating in future planning of technical workshops and faculty-student initiatives.
